The screenshot shows the Lirias website interface. At the top, there is a navigation bar with 'Home', 'Search', 'Browse', 'Sign on to', and 'Help' menus. The main content area features a 'WELCOME' section with a heading 'Welcome to the digital repository for KULeuven research!' and a search box. Below this, there are sections for 'COMMUNITIES' (listing various university departments) and 'Upcoming Training Sessions' (listing a workshop on 'Management of publications in Lirias').

K.U.Leuven libraries

- 11 Libraries
- > 4 M items
- Large e-resource collection
- Several repositories (research, AVM...)
- Integrate with
 - Archives
 - Museums

K.U.Leuven libraries

- Changing expectations of stake holders
 - End users
 - Management
- Consolidation of working processes
 - 95 % of original cataloguing
 - Go E-only
 - Integration of dispersed workflows
 - Integration in / with other systems eg. Blackboard, SAP, SSO, Self service systems incl. payment systems...

K.U.Leuven libraries

- Great team of librarians (approx. 170)
 - new generation coming in
- Stagnating budgets (ahum...)

A Library network

- Different types of libraries:
 - Collections
 - Size
 - Personnel
 - Budget
 - Needs
- Different cataloguing needs
 - Local keywords

A Library network

- Multilingual
- Different patron types and sources
- Separated administrative data (where needed)
- Resource sharing
 - ILL ↔ Intra-consortial borrowing
- Specific interfaces (including API's) and reports

A service provider

- Total Cost of Ownership (TCO)
 - Streamline technology
 - Complexity of operations
- Maintain / Increase service levels
- Sustain added value
 - Customised services / reports
- Public libraries
 - Focussed towards fulfillment...

Why we became a development partner

- Ex Libris came to us with an interesting vision about the future of libraries and library systems
- Challenging times for libraries
 - Net-generation
 - Budget cuts
 - There IS a world outside
- After streamlining the front office we need to streamline the backoffice → expectations
- We think we have something to offer and are encouraged by university management

It's [a]live, Jim... but not as we know it!

What we expect...

- From the process
 - Open minded approach!
 - Focus on what *really* matters
 - Question every existing workprocess
 - Think about alternatives for outdated processes
 - Think about new services
 - Look beyond traditional library borders
 - Exchange of best practices

What we expect...

- From the solution
 - A framework to create new services
 - e.g. based on statistical information
 - Alternatives for outdated processes
 - Integrated in the world outside
 - Integration of workprocesses across material types and departments...
 - but also across other library like organisations

What we expect...

- From the solution
 - Reduce Total Cost of Ownership (TCO)
 - Streamlined technology
 - Complexity of operations
 - Less cataloguing
 - Increase service levels

Goals of Unified Resource Management

- Integration of back-office processes (independent of material type, format, acquisition method) to
 - Streamline current work processes
 - Optimize staff resources
- Decrease total cost of metadata management through
 - New possibilities for automated data enrichment
 - Community building

Goals of Unified Resource Management

- Increase cooperation between libraries for ex. acquisition, collections, technical support...
 - Exchange of expertise and knowledge
- A service-oriented architecture that allows for local adaptations and additions to fulfill local needs

Strategy

CONSOLIDATE

**the
frameworks**

OPTIMISE

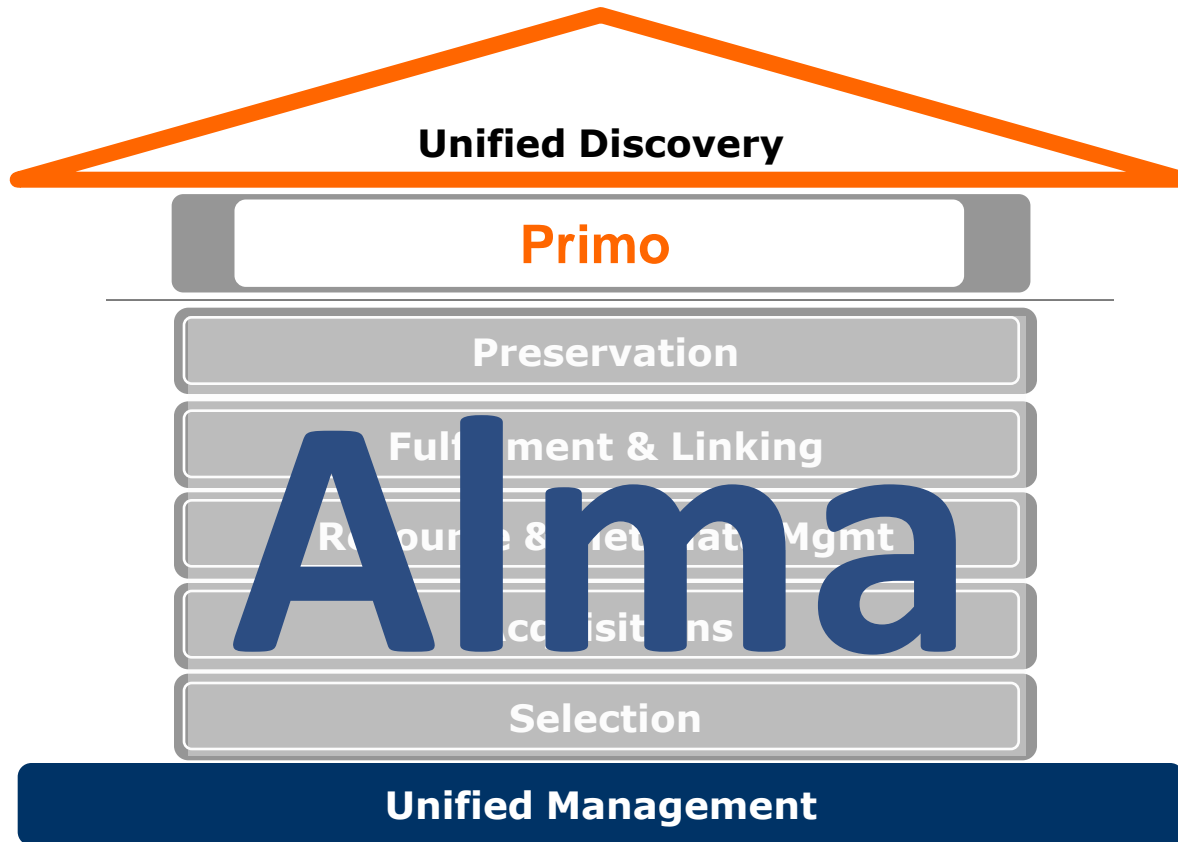

**through
collaboration**

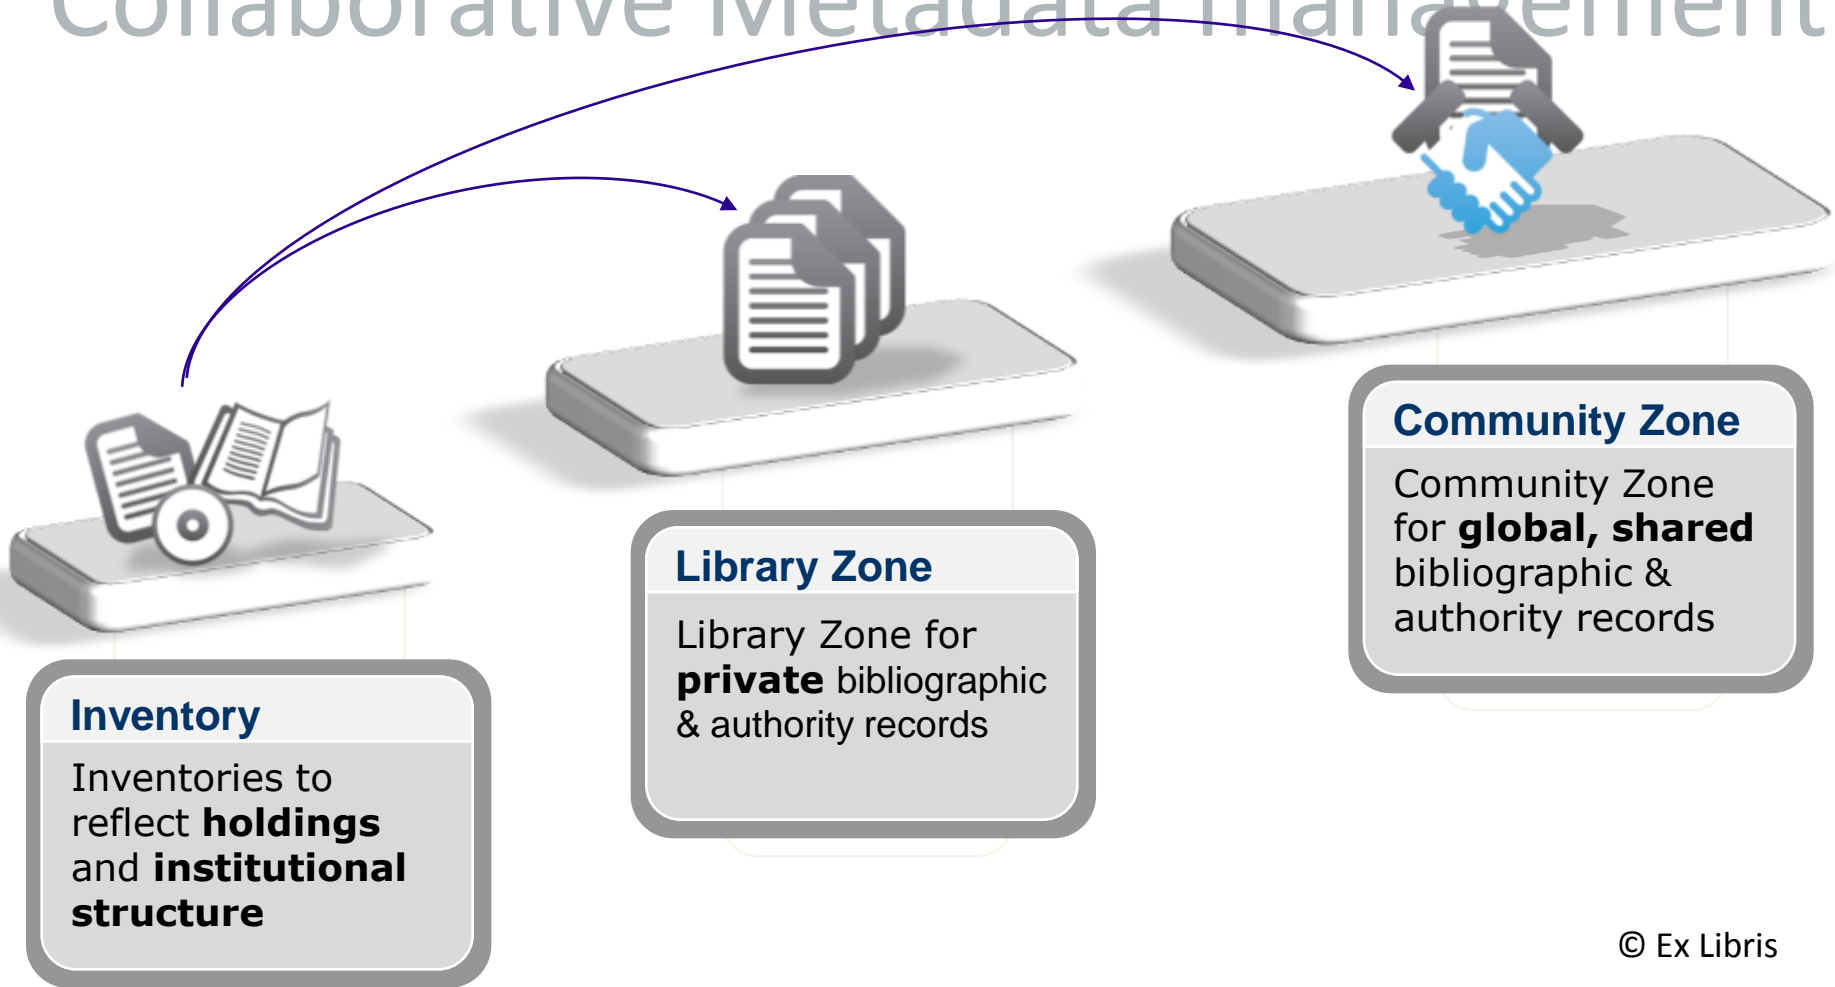

EXTEND

**the
range of services**

Consolidate the Frameworks

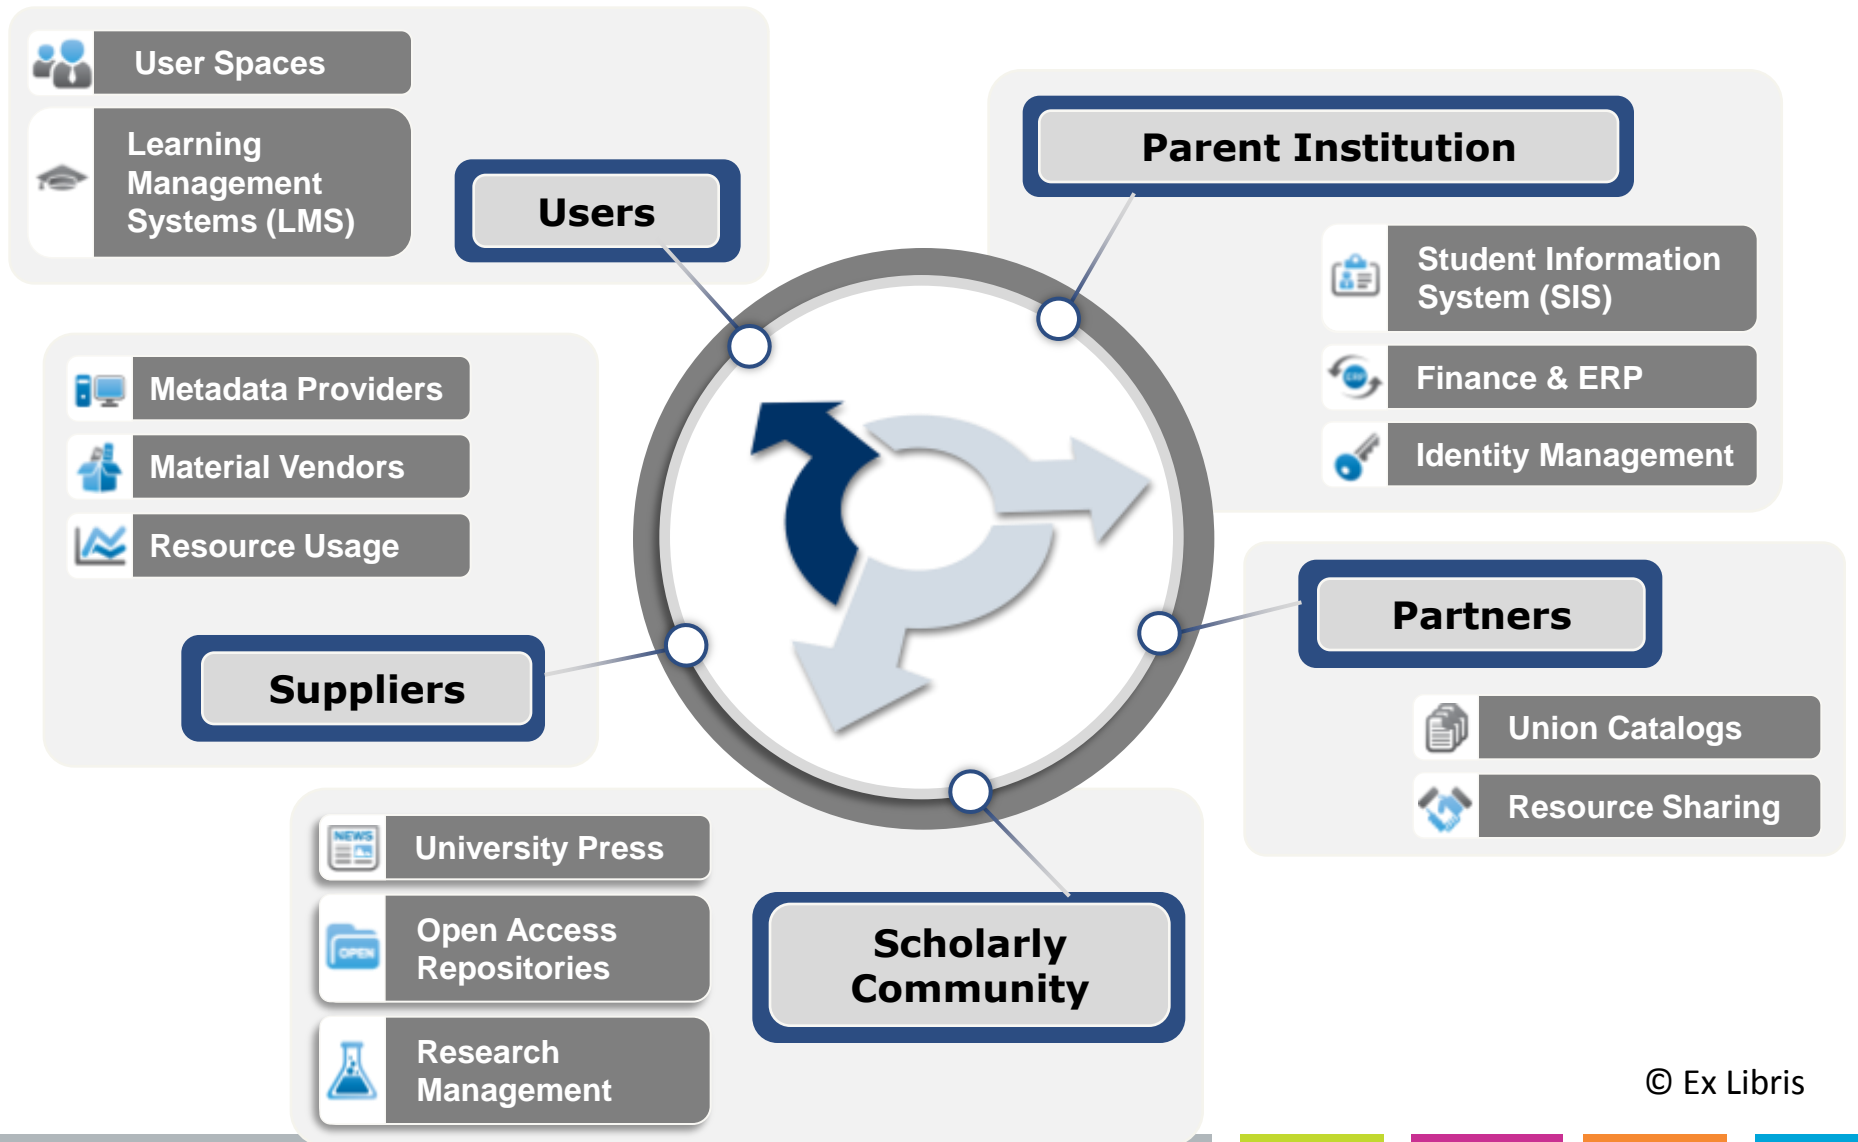

Collaborative Metadata management

- User-driven collection development
- Cross-resource type selection
- Combined acquisition and activation
- Usage-driven evaluation & renewal
- Digitization on demand
- Unified fulfillment – P, E, & D

CONSOLIDATE

- **Unified management** of all resource types
- Consolidated **workflows & data**

OPTIMISE

- **Cloud** service
- **Collaborations** (libraries, users)
- **Analytics**-driven

EXTEND

- **Open**, Service Oriented, Extensible
- Enables libraries to **offer new services**

The screenshot shows a Mozilla Firefox browser window with the URL http://demo1.alma.hosted.exlibrisgroup.com:1801/infra/action/pageAction.do?xmlFileName=search_search_router.xml&operation=search. The page displays the ExLibris Alma interface with a search for 'Kasmera'. The search results show one record: 'Journal (Facultad de Medicina, Univ...)' with ISSN: 0075-5222 and availability: 'Electronic Version at EB...'. A 'Save Query' button is visible at the bottom right of the search results area.

An overlaid window titled 'EBSCOhost - world's foremost premium research database service - Mozilla Firefox' is open, showing the login page for EBSCO Support Site. The URL is <http://search.ebscohost.com/Login.aspx?direct=true&authtype=cookie,ip,url,uid&db=lth&jn=KYV&scope=site>. The login form includes fields for 'User ID' and 'Password', and a 'Login' button. The page also features a central 'EBSCO HOST' logo surrounded by various database icons.
