

DSpace Metadata Panel

Open Repositories 2014 Helsinki

Bram Luyten, Sarah Potvin, Elin Stangeland, Pedro
Príncipe, Valorie Hollister, Maureen Walsh, Monica
Rivero

Google Scholar specific metadata on item pages through <meta> tags aka the Highwire Press

```
<meta content="Education, Sociology of." name="citation_keywords" />
<meta content="TEACHER UNDERSTANDING OF CARE: USING EMPIRICAL AND CONCEPTUAL ANALYSIS TO EXPLICATE THE MEANING OF CARE AS REFLECTED IN THE RELATIONAL ASPECTS OF THE CLASSROOM" name="citation_title" />
<meta content="Thompson, Goldie V." name="citation_authors" />
<meta content="https://shareok.org/handle/11244/8111" name="citation_abstract_html_url" />
<meta content="2014-05-10" name="citation_date" />
```

Mapping is located in config file on the server

```
google.citation_title = dc.title
google.citation_publisher = dc.publisher
google.citation_authors = dc.author | dc.contributor.author | dc.creator
google.citation_date = dc.date.copyright | dc.date.issued | dc.date.available | dc.date.accessioned
google.citation_language = dc.language.iso
google.citation_pmid =
google.citation_abstract_html_url = $handle
google.citation_fulltext_html_url =
google.citation_pdf_url = $simple-pdf
google.citation_keywords = dc.subject, dc.type
```

Similar to several other features, configurability IS present but ease of use could be much better with UI support.

The Scott Polar Institute's photographic negatives are a unique resource but also an extremely fragile one. The Freeze Frame project will digitise over 20,000 photographic negatives from 1845-1960, representing some of the most important visual resources for research into British and international polar exploration.

Digitisation of related documents - information from personal journals and official reports from expeditions on which these photographs were taken - will provide historical and cultural context for the images. It is also intended to add context to the images by displaying them alongside selected items from our pre-eminent collection of polar fine art, prints, drawings, and manuscript materials.

The International Polar Year 2007-08 is the first of its kind for fifty years. The timing of the IPY, coupled with growing interest in climate change, provides a unique opportunity for online resources at the Scott Polar Research Institute to reach a wider learning community than ever before. The forthcoming centenaries of the 'Heroic Age' expeditions to discover the Poles also demand of us that this visual archive is accessible to a global audience.

The Freeze Frame project aims to develop an online database of freely available visual and textual resources to support learning, teaching and research into topics relating to the history of Arctic and Antarctic exploration and science. Through a series of interpretative web pages and e-learning resources the project will provide access to hidden collections for all educational levels. It will encourage users to discover polar environments through the eyes of those explorers and scientists who dared to go into the last great wildernesses on earth.

For more information or for information on access to high-resolution versions of these images, please [refer to the SPRI picture library](#).

News

The collections held by the Scott Polar Research Institute, University of Cambridge, are among the richest in the world for the study of polar environments. Work begins in April 2007 on the Freeze Frame project to capture and preserve our archive of historical images in digital form.

DSpace Metadata Panel Discussion:

OpenAIRE contribution

Open Access Infrastructure for Research in Europe

OpenAIRE is about linking publications to projects

**METADATA IS
AGGREGATED THROUGH
SIMPLE OAI-SETS**

**EXPOSE OPEN ACCESS
PUBLICATIONS AND/OR
FUNDED PUBLICATIONS**

The projectID equals the Grant Agreement number, and is defined by the namespace:

**info:eu-repo/grantAgreement/*Funder*/
FundingProgram/*ProjectNumber*/
Jurisdiction/*ProjectName*/*ProjectAcronym*/**

OpenAIRE guidelines – *simplified*

Why specific guidelines?

NEEDED TO...

**FUNDING
INFORMATION**

projectID
dc:relation

**ACCESS RIGHTS AND
LICENSE INFO**

accessRights
dc:rights

**REFERENCED
DATASETS &
RELATED
PUBLICATIONS**

**Alternative Identifier
Referenced Dataset
Referenced Publication**
dc:relation

**EMBARGO DATE
INFORMATION**

embargoEndDate
dc:date

Most common metadata issues/gaps on the OpenAIRE compatibility:

- **Lack of dc:rights with access level**
 - openAccess
 - closedAccess
 - embargoedAccess
 - restrictedAccess
- **Full integration of *info:eu-repo* vocabulary**
 - Use terms from the info:eu-repo-Access-Terms vocabulary
 - info:eu-repo/semantics/closedAccess
 - info:eu-repo/semantics/embargoedAccess
 - info:eu-repo/semantics/restrictedAccess
 - info:eu-repo/semantics/openAccess
 - info:eu-repo/grantAgreement/
 - ...
- **Proper handle configuration**
 - usually this might be forgotten during 1st time configuration

Useful info:

- Find and discuss the guidelines at: guidelines.openaire.eu
- Test and register the repository at: validator.openaire.eu
- Find support and more info at: www.openaire.eu
- Access the OpenAIRE API documentation: api.openaire.eu

Wiki: <http://guidelines.openaire.eu>

Want to contribute?

Go to

<http://bit.ly/1I5Nfkf>

and add your metadata problem...

Thanks!
