Texas A&M University

- Mint ORCIDs for all graduate students

- Integration of ORCIDs into several enterprise systems/data points: LDAP, VIVO (profile system), Vireo (ETD system), DSpace repository

- Push dissertations to ORCID record as a Trusted Party

Progress through April 2014

- 10,334 ORCIDs minted for graduate students
- 2138 claimed in first 9 days
- Unclaimed ORCIDs due to variety of reasons:
  - Email not working (120)
  - Email not checked despite university requirement (lots)
  - Email checked but instructions not followed (some)
- Students who claim almost universally pleased to have an ORCID

Workflows: Adding ETDs

Opportunity and Challenges

- Emails to graduates (potentially months after ETD submittal) may not succeed…
- Currently pursuing a delegation of update privileges that occurs during Vireo workflow

Thank you!
