The University of Queensland

- Brisbane, Australia
- Top 100 university
- 35,000 Undergraduate Students
- 13,000 Postgraduate Students
- 4,000 teaching and research staff
- 4,000 FTE other Staff

UQ eSpace

- The single authoritative source for the research outputs of the staff and students of the University of Queensland
- Submission and archival home of UQ Research Higher Degree Theses in digital form

UQ eSpace

- Raises the visibility and accessibility of UQ publications to the wider world
- Provides data for mandatory Government reporting requirements such as the Higher Education Research Data Collection (HERDC) and Excellence in Research for Australia (ERA) as well as for the internal UQ systems such as the Q-Index.
- Operates as an institutional repository for open access publications and other digitised materials created by staff of the University such as print materials, photographs, audio materials, videos, manuscripts and other original works

Welcome to The University of Queensland's

Handy features

The screenshot shows a web browser window with the address bar displaying `https://espace.library.uq.edu.au/misc/api_view_info.php`. The page content includes five sections, each with a title and a form:

- Raw output we receive for Scopus or WOS via their API's we use when we import one record**
Scopus/Wok ID:
- Raw output we receive for Sherpa/Romeo via their API's**
Sherpa/Romeo - Journal ISSN:
- Raw output we receive for Ulrichs via their API's**
Ulrichs - ISSN:
- Raw output we receive for solr via our API**
PID:
- Raw output we receive for links AMR via their API (It will match a WOS ID)**
PID:

The Future

- One full time developer
- Risk of employee leaving
- Moving to other software. On going costs. The need for management.

Visualising University of Queensland Institutional Data

What?

- Authors application
- Organisations application
- Future - UQ wide application

How?

- Service Oriented Architecture
- Amazon infrastructure
- Laravel PHP backend
- AngularJS + others/Bootstrap Frontend
- Jenkins/Karma/PHPUnit
- Datasets and APIs...

A composite image on the left side of the slide. The top part shows a person's hands writing in a notebook with a pencil. The bottom part shows an open book lying on a wooden surface. The image is partially cut off by the slide's edge.

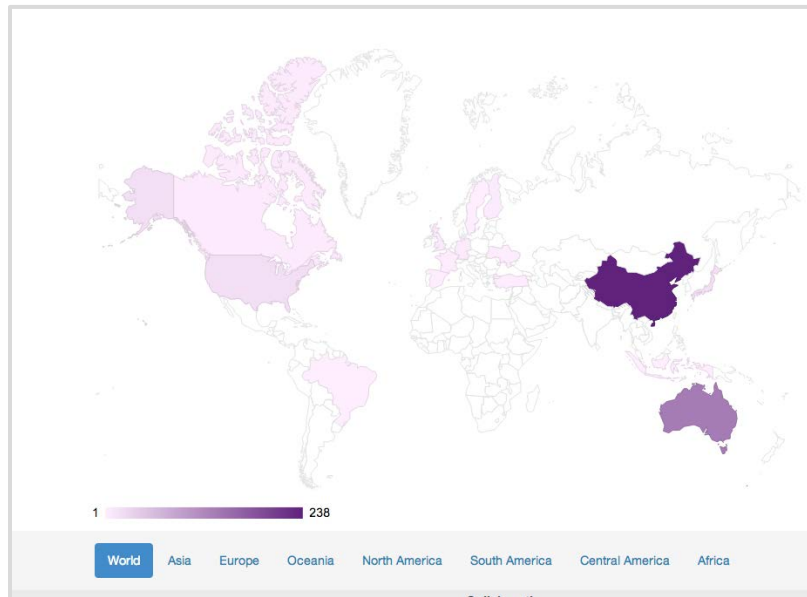

The Elsevier Scopus Custom Dataset and InCites Dataset

- Scopus Custom Dataset
 - ~19 million XML documents and counting
 - Dataset purchased for pulling specific statistics
 - Biannual updates
- InCites Dataset
 - Pipe delimited text files
 - Link to download data periodically

Allowed to utilise derived statistics so long as references provided

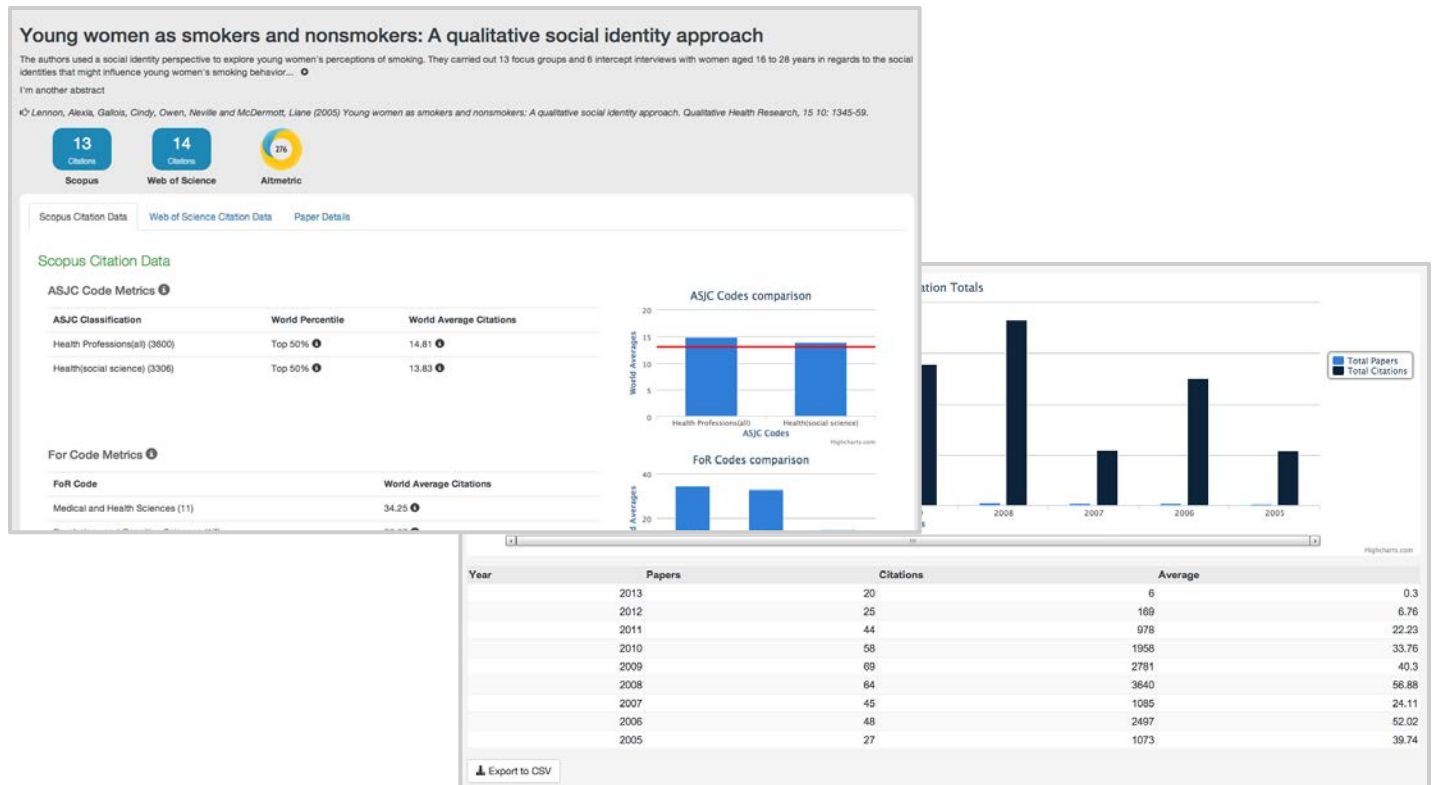

What else could we do with the data when married with the data already in our institutional repository?

Country and Institutional Collaboration

Google Charts/Maps/GeoCoding APIs

Paper Metrics and Citation History

Highstock, Altmetric

Challenges of integrating external datasets

- Data not provided in a database ready format
- Data limited to certain years
- Data provided periodically
- Data is often dirty, authors and institutions identifiers sketchy
- Asking the right questions
- Collaboration with other areas of the university

Jenkins

The screenshot shows the Jenkins web interface for a project named 'espacestaging'. The browser address bar shows the URL 'sky.library.uq.edu.au:8080/jenkins/job/espacestaging/'. The page title is 'Jenkins' and the breadcrumb is 'Jenkins > espacestaging >'. The interface includes a navigation sidebar on the left with links for 'Back to Dashboard', 'Status', 'Changes', 'Workspace', 'Build Now', 'Delete Project', 'Configure', and 'Email Template Testing'. The main content area is titled 'Project espacestaging' and contains several sections: 'Workspace', 'Recent Changes', 'Latest Test Result (no failures)', 'Document links' (with links for 'Zoetrope videos' and 'Formatted Results'), and 'Permalinks' (with links for 'Last build (#1119)', 'Last stable build (#1118)', 'Last successful build (#1118)', 'Last failed build (#1109)', and 'Last unsuccessful build (#1109)'). A 'Build History' section on the left shows a list of builds from #1104 to #1119, with the most recent build (#1119) on Jun 2, 2014 at 5:06:48 PM. A 'Test Result Trend' chart on the right shows a bar chart of build counts over time, with a red bar indicating a failure at build #1109. The chart title is 'Bruce Schneier knows the state of schrodinger's cat' and 'Test Result Trend'. A small image of a man with a beard is visible in the bottom right corner of the screenshot.

Lessons learned

- APIs often fail
- Easy debugging and access
- Undocumented and lost issues

Thanks for listening!

For further details:

Come up and talk to us throughout the conference or...

We'll be doing a poster presentation and demonstration
@ 6:30pm-8:30pm · Location: Kaisa House
