Alkusanan

Vuoden 1969 maatalouslaskennan julkaisussa I on jo esitetty tietoja maatilojen metsälöiden suuruussuhteista. Nyt julkaistavassa niteessä III esitetään metsälöiden suuruussuhteista, omistussuhteista ja eräistä muista seikoista tietoja paitsi kunnittain myös piirimetsälautakunnittain, ja muodostavat tulokset kokonaisuutena katsoen ns. metsälötilaston. Aineiston käsitteilyä ovat johtaneet ja tulostaulut laatineet aktuaarit Aune Väisänen ja Maire Janhunen, joista edellinen on laatinut myös tekstikatsauksen.

Helsingissä, Maatalihallituksessa, toukokuussa 1971.

Förord

I lantbruksräkningens år 1969 publikation I har redan anförts uppgifter om de av lantgårdarna ägda skogsbruksenheternas storleksförhållanden. I föreliggande band III anföres uppgifter om skogsbruksenheternas storleksförhållande, besettingsförhållanden och vissa andra omständigheter, förutom kommunvis även per distrikts-skogsnämnd. Resultaten, som helhet betraktade, bildar, den sk. skogsbruksenhetsstatistiken. Aktuarierna Aune Väisänen och Maire Janhunen har lett bearbetningen av materialet samt uppgjort resultattabellerna, och den förstnämnda har även uppgjort textöversikten.

Helsingfors, på Jordbruksstyrelsen i maj 1971.

Metsälötilasto

Johdanto

Maataloustilastosta 13. päivänä tammikuuta 1950 annetun lain (7/50) ja sen täytäntöönpanosta samana päivänä annetun asetuksen (8/50) mukaisesti pantiin vuonna 1969 toimeen maatalouden peruslaskenta. Tässä laskennassa kerättyjen ensitietojen perusteella on koottu ja laskettu käsillä oleva metsälötilasto. Aikaisemmin on vastaavanlainen tilasto laadittu vuosien 1929—1930 maataloustiedustelun aineiston perusteella (N. A. Osara: Metsälötilasto vuodelta 1929. Metsätieteellisen tutkimuslaitoksen julkaisu 21.2. vuodelta 1930) ja vuoden 1950 yleisen maatalouslaskennan yhteydessä (Maatalous III:45:3 Yleinen maatalouslaskenta v. 1950. Osa III: Metsälötilasto) sekä vuoden 1959 yleisen maatalouslaskennan yhteydessä (Maatalous III:55 Yleinen maatalouslaskenta III nide Metsälötilasto). Vuoden 1929—1930 laskentaan perustunut tilasto käsittelee kuitenkin vain maatalametsät. Vuosien 1950 ja 1959 tilastoissa sensiaan olivat mukana myös maatiloihin kuulumattomat metsät.

Käsillä olevassa julkaisussa metsälöllä tarkoitetaan sellaista metsäalueutta (tai -alueita), jota (joita) hoideetaan yhtenäisen metsätaloussuunnitelman mukaan. Tästä johtuen metsälötilasto käsitteää myös nyt paitsi tiloihin liittyvät, myös niihin liittymättömät metsäalueet.

Metsät ovat tilastossa ryhmitelty niiden suuruuden mukaan luokkiin likimain samalla tavalla kuin aikaisemmin. Metsälöön on laskettu kuuluvan kasvullisen alian lisäksi myös ns. kitumaa. Tämä siitä syystä, että vertailukelpoisuus aikaisempiin metsälötilastoihin säilyisi. Joutomaita, teitä yms. ei sen sijaan ole laskettu metsälön alaan mukaan.

Tulostaulut on laadittu kunnittain ja piirimetsälautakunnittain kaikista metsälöistä sekä erikseen yksityisten omistamista metsälöistä.

Maatiloihin kuuluvia metsälöitä koskevat pinta-alatiedot on saatu peruslaskennassa käytetyiltä pääalomakkeilta. Nämille kerättiin 15. 6. 1969 tietoja kaikilta sellaisilta maatiloilta, joilla oli peltöä ja puutarhaa yhteensä vähintään 1.00 ha. Tiloihin kuuluvan metsälöistä hankittiin vastaavat tiedot laskentalautakuntien toimesta kuntien veroluokituskortistoista ns. metsätaluelettelolle kaikista sellaisista yksiköistä, jotka eivät täyttäneet yllämainittuja maatiloille asetettuja vähimmäisvaatimuksia, mutta joissa oli maata vähintään 2 ha.

Laskennasta saatujen ensitietojen lisäksi täydennettiin tilastoa erällä tarkistustiedusteluilla. Niinpä metsähallituksen, metsäntutkimuslaitoksen ja puolustusvoi-

Skogsbruksenhetsstatistik

Inledning

Enligt lagen om lantbruksstatistik given den 13. januari 1950 (7/50) och om dess förverkligande samma dag givna förordningen (8/50) verkställdes år 1969 lantbrukets primärräkning. På basen av de primäruppgifter som insamlats har föreliggande skogsbruksenhetsstatistik sammanställts. Tidigare har en motsvarig statistik uppgjorts på basen av materialet från 1929—30 års lantbruksförfrågning (N. A. Osara: Metsälötilasto vuodelta 1929. Forstvetenskapliga forskningsinrättningens publikation 21.2. Av år 1930) och i samband med den allmänna lantbruksräkningen år 1950 (Lanthushållning III:45:3. Den allmänna lantbruksräkningen år 1950 del III Skogsbruksenhetsstatistik) samt i samband med 1959 års allmänna lantbruksräkning (Lanthushållning III:55. Allmänna lantbruksräkningen band III Skogsbruksenhetsstatistik). Statistiken som grundar sig på räkningen år 1929—30 omfattade dock endast lantgårdarnas skogar. I statistiken av år 1950 och 1959 var även de till lantgårdarna ej hörande skogsbruksenheter med.

I den föreliggande publikationen avses med en skogsbruksenhets ett sådant skogsområde (eller -områden), vilket (vilka) skötes inom ramen för en enhetlig skogshushållningsplan. Härav kommer det sig att skogsbruksenhetsstatistiken omfattar förutom de till lantgårdarna hörande även till dem ej hörande skogsområden.

Skogsbruksenheter har i statistiken grupperats enligt deras storlek i klasser i det närmaste på samma sätt som tidigare. Till skogsbruksenheten har räknats förutom växtlig även s.k. mindre växtlig skogsmark. Detta därför, att jämförbarheten med tidigare skogsbruksenhetsstatistik skall kunna bibehållas. Impediment, vägar o.d. har däremot ej hämförts till skogsbruksenhets areal.

Resultattabellerna har uppgjorts kommunvis och per distriktskognämnd för alla skogsbruksenheter samt skilt för av privata ägda skogsbruksenheter.

Arealuppgifterna berörande de till lantgårdarna hörande skogsbruksenheter har erhållits från de vid primärräkningen använda huvudblanketterna. Med dessa insamlades den 15. 6. 1969 uppgifter från alla sådana lantgårdarna, vilka hade åker och trädgård sammanlagt minst 1.00 ha. Uppgifterna över de skogsbruksenheter, som ej hör till lantgårdarna införskaffades genom räkningsnämndernas försorg från kommunernas skatteboniteringskort på s.k. skogslägenhetsförteckningar för alla sådana enheter, vilka ej fyllde ovan nämnda de för lantgårdarna åsatta minimifordringarna, men vilka hade jord minst 2 ha.

Utöver de uppgifter, som erhållits från räkningen, kompletterades statistiken med vissa kontrollförfrågningar. Således införskaffades uppgifterna över de

mien hallinnassa olevista alueista hankittiin tiedot suoraan ja niitä verrattiin laskennasta saatuihin ensitietoihin. Samoin suoritettiin tarkistuksia erityisesti pohjois-Suomessa asutushallituksen hallinnassa olevien asukkaattomien tilojen metsälöiden osalta. Myös seurakuntien hallinnassa olevat metsäalat tarkistettiin kirkkohallituksen luetteloiden ja osaksi myös suorien kyselyjen avulla. Samoin metsäteollisuusyhtiöltä on tiedusteltu suoraan niiden maanomistusta ja verrattu saatuja tietoja laskennasta saatuihin ensitietoihin. Vertailujen tuloksesta on tehty eräitä täydentäviä korjauksia.

Metsälöistä, jotka ovat olleet yhden tai useamman henkilön, perikuntien, kuolinpesien tai perheyhtiöiden omistuksessa, on laadittu erilliset tulostaulut. Muiden maanomistajaryhmien osalta ei ole julkaistu erillistä metsälötilastoa. Maanomistustilastosta ovat nämä eri omistajaryhmien hallinnassa olevat maa-alat kuitenkin maankäyttöläjeittain saatavissa.

Metsälötilaston kunnittaiset ja piirimetsälautakunnittaiset tulokset on laskettu siten, että toisen kunnan alueelle ulottuvat metsälöt on laskettu tämän kunnan alueeseen. Lisäksi on mainittava, että eri metsäsuurustuloikkien metsäalat (taulu no 9) ovat todellisia eivätkä likimäääräisiä lukuja kuten vuonna 1950.

i forststyrelsens, forstvetenskapliga forskningsinrättningens samt i försvarsmaktens förvaltning varande områdena direkt och de jämfördes med de uppgifter, som erhållits från räkningen. Motstånd kontrollerades speciellt i norra Finland de i kolonisationsstyrelsens besittning varande skogsbruksenheterna hörande till gårdar, som saknar bosättning. Även de i församlingsgarnas besittning varande skogsområdena granskades medelst kyrkostyrelsens förteckningar och delvis även genom direkta förfrågningar. Likaledes har även till skogsindustribolagen gjorts direkta förfrågningar om deras jordbesittning och de erhållna uppgifterna har jämförts med de uppgifter, som erhållits från räkningen. Som resultat av jämförelserna har vissa kompletterade korrigeringar kunnat göras.

Skilda resultattabeller har uppgjorts över skogsbruksenheter, vilka ägs av en eller flera personer, arvingar, sterbhus, eller familjebolag. För övriga jordägargrupper har ej en skild skogsbruksenhetsstatistik publicerats. Från jordbesittningsstatistiken kan dock dessa i olika jordägargrupper ägo varande jordarealer erhållas.

Skogsbruksenhetsstatistiken resultat kommunvis och per distriktskognämnd har uträknats så att de skogsbruksenheter, som sträcker sig till en annan kommunens område, har räknats till denna kommunens areal. Därtill kan nämnas att skogsarealerna i de olika skogsbruksenheternas storleksklasser (tabell no 9) är exakta tal och ej approximativa värden som år 1950.

Tilastoston tulokset

Metsälöiden lukumäärä oli vuoden 1969 maatalouden peruslaskennan mukaan 383 710 ja niiden yhteinen metsäala 19 056 980 ha. Sellaisia metsälöitä, joiden metsäala oli vähintään 5 ha, oli kaikkiaan 308 456 kpl eli 80.4 %. Kokonaan metsätömiä yksiköitä oli 18 248 eli 4.8 %. Alle 5 ha metsää käsittäviä yksiköitä oli 57 006 eli 14.8 %.

Statistikens resultat

Skogsbruksenheternas antal var enligt primärräkningen år 1969 inalles 383 710 och deras sammanlagda skogsareal 19 056 980 ha. Inalles hade 308 456 eller 80.4 % av skogsbruksenheterna en skogsareal om minst 5 ha. Helt utan skog var 18 248 enheter eller 4.8 %. Under 5 ha skog omfattande enheter utgjorde 57 006 eller 14.9 %.

¹⁾ Vuosina 1959 ja 1969 ovat mukana kokonaisalaltaan vain 2 ha:ja suuremmat metsälöt, v 1950 kalkki tontitkin — År 1959 och 1969 är endast skogsbruksenheter med över 2 ha, med år 1950 även alla tomter

Vuoden 1959 laskennassa oli yksiköiden koko luku-määrsä 431 863. Näistä oli 5 ha metsää käsittäviä yksi-köitä 301 548. Syynä siihen, että pienmetsälöitä oli vuoden 1959 laskennassa yli 20 000 enemmän vuoteen 1969 verrattuna, on se, että silloin laskennassa mukana olevien alaraja oli 0.25 ha, nyt 1.00 ha peltoa.

Metsälöitä, joilla oli 5 ha tai enemmän metsämäata, oli vuoden 1969 laskennan mukaan 6 908 enemmän kuin vuonna 1959.

Suurten metsälöiden luku (metsäala 2 000 ha tai enemmän) on myös lisääntynyt. Vuoden 1969 laskennassa niitä oli 316 vastaavan luvun ollessa 286 vuonna 1959. Tähän lienee syynä lähinnä yhtiöiden viimeaiskoina lisääntyneet metsäostot. Muutokset metsälöiden luku-määrisä selviävät edellä olevasta asetelmasta.

Yksityismetsälöiden lukumäärä oli vuonna 1969 yhteensä 369 433 ja niillä metsämäata 11 353 024 ha. Metsätömiä tiloja oli 17 170 ja alle 5 ha:n metsälöitä 55 010.

Yksityiskohtaiset tiedot metsälöiden lukumääristä metsälösuuruuksluokittain ja piirimetsälautakunnittain sekä kunnittaiset metsäalat niin kaikkien kuin yksityis-metsälöidenkin osalta on esitetty seuraavassa taulu-osassa.

Vid räkningen år 1959 var det totala antalet enheter 431 863. Av dem omfattade 301 548 st. 5 ha skog. Orsaken till, att de små skogsbruksenheternas antal var vid räkningen år 1959 över 20 000 st större jämfört med år 1969 är att, då ingick i räkningen enheter med 0.25 ha åker eller mer medan denna undre gräns nu gick vid 1.00 ha.

Antalet skogsbruksenheter, som hade 5 ha eller mera skogsmark var år 1969 6 908 större än år 1959.

Antalet stora skogsbruksenheter (skogsarealen över 2 000 ha) har även ökat. Vid räkningen år 1969 var deras antal 316 och motsvarigt år 1959 266. Detta torde främst bero på bolagens under de senaste tiderna allt tilltagande skogsköpverksamhet. Förflyttningarna av skogsbruksenheternas antal framgår ur det föregående sammandraget.

Antalet privata skogsbruksenheter var år 1969 sammanlagt 369 433 och deras skogsmark 11 353 024 ha. Lantgårdarna utan skog utgjorde 17 170 och skogs-bruksenheter omfattande under 5 ha skog 55 010.

Detaljerade uppgifter om skogsbruksenheternas antal per skogsbruksenheterens storleksklasser och distrikts-skogenämnd anföres kommunvis såväl för alla som för de privata skogsbruksenheternas del i följande tabelldel.

Statistics on forest holdings, 1969

Introduction

The present statistics on forest holdings have been compiled and calculated from the preliminary data gathered for the 1969 Census of Agriculture¹⁾. Earlier statistics of this kind have been compiled from the material of the Agricultural Survey of 1929—30²⁾ the Agricultural Census of 1950³⁾ and the Agricultural Census of 1959⁴⁾. The 1929—30 statistics only covered forest holdings belonging to farms. Those of 1950 and 1959 comprised other forest holdings, in addition.

The term «forest holding» refers here to an area (or areas) of forest land managed according to uniform plan of forestry. Though the majority of such areas belong to farms, not all do so.

Forest holdings have been grouped in size categories for the present statistics in roughly the same way as for earlier ones. Their areas are taken to include «poorly productive» forest land in addition to «productive» forest land, but not waste land, roads, etc.

The data in the tables have been drawn up per commune and per district board of forestry area. Those for all forest holdings and privately owned forests are shown separately.

Information on the area of farm forests has been taken from (Form 1) of the Census of Agriculture. This form was used to note down the facts, as of 15. 6. 1969, on all farms with a total arable land and garden area of at least

1.00 ha. Similar data on forest holdings not belonging to such farms of the maximum sizes mentioned above, but forming part of units with a land area of 2 ha or over were extracted by the census committees from the tax classification card indexes of the communes, and entered on a separate list of forest holdings.

The preliminary material from the Census was supplemented with certain additional inquiries. For example, data on areas administered by the Central Board of Forestry, the Institute of Forest Research, and the defence forces was obtained direct and collected with the preliminary data from the Census. Other adjustments were also made, particularly as regards forest holdings belonging to vacant farms administered by the Board of Land Settlement in N. Finland. The forest area of parish owned land was checked from the lists of the administrative board of church — and to some extent by direct enquiry. Land owned by the major wood industry companies was also ascertained direct, and the results compared with the preliminary data of the Census. The comparisons resulted in certain additions and adjustments.

Separate tables have been drawn up showing forest holdings owned by one or more persons, co-heirs, and small family firms. No separate statistics have been published for other owner categories, though these are available from the land ownership statistics.

¹⁾ Taken in conformity with the Act (7/50) on Agricultural Statistics and the Presidential Decree (8/50) on the application of this Act.

²⁾ N.A. Osara: Statistics on Forest Enterprises in 1929.

³⁾ The 1950 Census of Agriculture, Vol III: Statistics on Forest Enterprises.

⁴⁾ Agriculture, Vol. III: Census of Agriculture, Statistics of Forest Holdings, 1959.

In breakdowns per commune and per forestry board districts, where a forest holding extends into another commune or area, it is counted as belonging to these latter. The surface measurements on which the forest size categories are based (Table 9) are more accurate than they were in earlier Censuses.

Forest holdings were found during the 1969 agricultural Census to number 383 710 and to cover a total forest area of 19 056 980 ha. 308 456 forest holdings — 80.4 per cent of the total had a forest area of at least 5 ha. Holdings with no forest area at all numbered 18 248 and accounted for 4.8 per cent of total. There were 57 006 holdings (14.8 per cent of total) with under 5 ha of forest land.

The 1959 Census gave a total number of 431 863 holdings 301 548 of these had 5 ha of forest land or over. The reason why there were over 20 000 small forest holdings more than in 1959 was that this Census included

farms with an area of 0.25 ha arable land and garden but the same area was in the 1969 Census 1.00 ha.

Forest holdings with 5 ha or more of forest land numbered 6 908 more in 1969 than they did in 1959. The number of big forest holdings (forest area 2 000 ha or more) had increased 316 in 1969, as against 266 in 1959.

That could possibly in the first place depend on the forestbargains of the companies which have lately taken place.

In 1969 there were 369 433 privately owned holdings. Their total forest area was 11 353 024 ha. Farms without forests numbered 17 170 and those with less than 5 ha of forest holdings 55 010.

The following tables give greater detail regarding the number of forest holdings per size category and per district board of forestry area, and forest areas per commune for all forest holdings and privately owned ones.

Changes in the number of forest holdings per sizecategory can be seen from the following table:

| Forest area | 1950 | | 1959 | | 1969 | | |
|-----------------|----------|------|----------|------|----------|------|---------------------------------|
| | Quantity | % | Quantity | % | Quantity | % | Increase + Decrease — from 1959 |
| 0 | | | 52 479 | 12.1 | 18 248 | 4.8 | - 34 231 |
| — 1.99 | 272 849 | 50.3 | 41 186 | 9.5 | 18 981 | 4.9 | - 22 205 |
